Contents

Preface	i
List of publications of Michal Křížek	iii
<i>J. Chleboun</i>	
Michal's roses of Jericho	xxxii
<i>H. Azari, T. Liu, S. Zhang</i>	
Identification of parameters in parabolic inverse problems	1
<i>H. Azari, F. Parzlivand, S. Zhang</i>	
A mesh free numerical method for the solution of an inverse heat problem	14
<i>J. Brandts, J. van den Hooff, C. Kuiper, R. Steenkamp</i>	
From binary cube triangulations to acute binary simplices	31
<i>P. Burda, J. Novotný, J. Šístek</i>	
Analytical solution of Stokes flow near corners and applications to numerical solution of Navier-Stokes equations with high precision	43
<i>M. Čertíková, P. Burda, J. Šístek</i>	
Numerical comparison of different choices of interface weights in the BDDC method	55
<i>X. Dai, L. He, A. Zhou</i>	
Adaptive finite element analysis based on perturbation arguments	62
<i>V. Dolejší</i>	
An adaptive hp -discontinuous Galerkin approach for nonlinear convection-diffusion problems	72
<i>B. Ducomet, Š. Nečasová</i>	
On the motion of rigid bodies in a compressible viscous fluid under the action of gravitational forces	83
<i>I. Faragó, Á. Havasi, Z. Zlatev</i>	
The convergence of explicit Runge–Kutta methods combined with Richardson extrapolation	99
<i>L. Kárná</i>	
Carcassonne — description of the game	107
<i>R. Keslerová, K. Kozel</i>	
Steady and unsteady 2D numerical solution of generalized Newtonian fluids flow	117

<i>S. Korotov</i>	
On conforming nonobtuse tetrahedralizations of some cylindrical-type domains	127
<i>Q. Lin, H. Xie</i>	
A multilevel correction type of adaptive finite element method for Steklov eigenvalue problems	134
<i>Q. Lin, D. Xu, S. Zhang</i>	
Uniform L^1 error bounds for semi-discrete finite element solutions of evolutionary integral equations	144
<i>P. Louda, K. Kozel, J. Příhoda</i>	
On using artificial compressibility method for solving turbulent flows	163
<i>L. Ludwig, H.-G. Roos</i>	
Superconvergence for convection-diffusion problems with low regularity	173
<i>N. Madden, M. Stynes</i>	
A curious property of oscillatory FEM solutions of one-dimensional convection-diffusion problems	188
<i>I. Marek</i>	
A sufficient condition for non-oscillatory behavior of some input/output models	197
<i>P. Pořízková, K. Kozel, J. Horáček</i>	
Numerical comparison of unsteady compressible viscous flow in convergent channel	203
<i>V. Pravda</i>	
Algebraic classification of the Weyl tensor: selected applications	214
<i>A. Pravdová</i>	
Algebraic classification of the Weyl tensor	224
<i>B. Riečan</i>	
A strengthening of the Poincaré recurrence theorem on MV-algebras	236
<i>K. Segeth</i>	
Smooth approximation and its application to some 1D problems	243
<i>J. Šístek, J. Mandel, B. Sousedík</i>	
Some practical aspects of parallel adaptive BDDC method	253
<i>L. Somer</i>	
My twelve years of collaboration with Michal Křížek on number theory	267
<i>T. Vejchodský</i>	
Computing upper bounds on Friedrichs' constant	278

<i>J. Vondrák</i>	
New model of precession, valid in time interval 400 thousand years	290
<i>N. Yan</i>	
Boundary element method for convex boundary control problems	300
<i>A. Ženíšek</i>	
On Křížek's decomposition of a polyhedron into convex components and its applications in the proof of a general Ostrogradskij's theorem	309
<i>T. Zhang, S. Zhang, H. Azari</i>	
Finite element analysis for a regularized variational inequality of the second kind	317
List of authors	332
List of participants	333
Program of the conference	336
